

Simplify your life... take control of your home

There is a home automation system for every lifestyle...

Give Your Home A Brain

Think of an automation controller as the brain of your automated home. It controls and monitors various systems to maximise safety, comfort, convenience and energy savings. Automate your home to react based on your schedule or any event.

New Or Retrofit

Automation systems may be installed in new construction or retrofitted into your existing home. Simply choose automation features based upon your individual needs and budget.

Easy to Use

Our automation systems are simple to understand and operate, which is why they are automation smart. Control your entire home or holiday home from anywhere in the world with no fees.

Interfaces & Software

Total Home Control From A Single Interface

Enjoy the one-touch control via easy to recognise icons on dedicated in-wall touch screens or mobile devices.

Internet Access & Control

Control your home from anywhere with zero fees.

Motion Detection

Detect intruders plus turn on lights and more when entering a room.

Home Theatre

Use an iPad to control A/V equipment, lower projection screens and close window coverings.

Energy Management

Be comfortable at home. Save energy when away. Control temperatures in greenhouses, humidors, wine cellars, aquariums & attics.

Multi-Room Audio

Use Bluetooth to share your favorite streaming or stored music via your tablet or smartphone.

Pool & Spa

Control pumps, filters, timers, heaters, temperatures and solar. Secure pool areas with access control.

Lighting

Set moods for dining, movies or entertaining. Lights automatically turn on upon arrival. Provide architectural quality lighting control and passive security for the "lived-in" look when on holidays.

Surveillance Cameras

View live footage from a touchscreen or a mobile device and activate based on motion.

Irrigation

Control solenoid valves for lawn sprinklers plus inputs for rain sensing.

Access Control

Limit access to designated areas. Swipe a card to arm the alarm, lock doors, etc.

Security & Fire

Professional UL security is built-in. Keep your family safe with PIR sensors.

Vehicle Detection

Announce visitors, turn on lights and activate audio zones or pumps.

Simplified, Specific... Home And Building Automation

Energy Management

We can allow customers to monitor and control temperature, humidity and heavy-duty loads based on occupancy or time/day. Manage hot water units, water features, pool-pumps, ceiling fans, irrigation, ventilation, heating and cooling, blinds, shades and shutters. Easily automate the property based on occupancy or events.

Distributed Audio

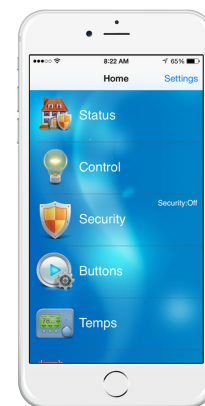

Share music via Bluetooth from a smartphone or tablet and utilise the app for control of all audio sources and zones. Pick up a telephone on the premises to deliver an announcement over the speakers.

Automation Systems

An Elecfit smart automation system provides comprehensive energy management and sophisticated lighting control to both homes and small commercial buildings. Systems can support numerous types of lights, dozens of thermostats, heaters and coolers, pumps, irrigation valves and a wide variety of smart devices.

Lighting Control

Automation control is the reliable way to institute comprehensive lighting controls for increased energy savings, safety and ambience. Elecfit can automate lighting based on time of day, have all lights turn on during an emergency, control exterior building signage or even add that final touch to the garden at night time. From a touchscreen, smartphone or tablet, easily dim a light or turn all the lights on/off with one simple press.

Our automation systems can be applied to control townhouses, warehouses or anything in between. Easy to operate, high performing products.

With over 12 years experience in the industry, Elecfit is the Smart Choice!
